

Indigenous Climate and Environmental Collaborative (ICEC)

Mission:

To champion and seamlessly weave Indigenous knowledge into the fabric of climate and environmental research, initiatives, and advocacy, fostering a holistic approach to ecological stewardship across diverse populations.

Vision:

A world where Indigenous knowledge stands at the forefront of climate and environmental solutions, shaping a sustainable, resilient, and harmonious future for all inhabitants of our Earth.

Goals:

1. **Research Enhancement:** Promote, fund, and facilitate research projects that prioritize and integrate Indigenous methodologies and knowledge systems in environmental and climate studies.
 2. **Community Engagement:** Foster active partnerships with Indigenous communities, ensuring their voices, experiences, and knowledge guide the ICEC's initiatives and strategies.
 3. **Policy Advocacy:** Engage with policymakers at local, national, and global levels to infuse Indigenous perspectives into climate and environmental policies, ensuring respectful and actionable recognition.
 4. **Educational Outreach:** Develop and implement educational programs and resources that spotlight the importance of Indigenous knowledge in addressing contemporary environmental and climate challenges.
 5. **Capacity Building:** Empower Indigenous communities with the resources, training, and platforms necessary to lead and advocate for sustainable environmental practices and climate resilience.
 6. **Collaborative Initiatives:** Establish alliances with academic institutions, NGOs, governments, corporations, and international Indigenous communities, leveraging collective strengths for impactful, Indigenous-informed climate and environmental solutions.
 7. **Cultural Preservation:** Safeguard and promote Indigenous ecological practices, spirituality, and stories, recognizing them as invaluable assets in the global effort to combat climate change and environmental degradation.
 8. **Continuous Adaptation:** Monitor and evaluate the effectiveness of initiatives, adapting to emerging challenges and opportunities in the climate and environmental sectors, always with an ear to Indigenous knowledge.
-

By embracing the profound knowledge of Indigenous peoples, the ICEC aspires to be a beacon of hope, resilience, and innovation in the global journey toward a sustainable and harmonious relationship with our planet.
