RETENTION and GRADUATION by MAJORS

At the forefront of everything we do, TRIO Student Support Services is looking for ways to improve our services in an effort to better serve our students. While doing so, we are reminded that it is important to examine our current success rates as we work toward meeting higher retention and graduation rates for our participants. I recently ran a comparison of retention and graduation rates for the last ten years based on majors within our program. The data shows once again that we have a strong program in place with effective services delivering positive outcomes. A review of the data provided the following results:

RETENTION

Once TRIO SSS students have declared a major (and, if applicable, been fully accepted into an impacted program), their retention rates are exceedingly high. Over the last decade, ten majors within TRIO SSS have maintained 100% retention (right graph), while another five majors hold a retention rate of 90 – 97% retention (Left graph)

GRADUATION

Of our most populated majors, Business Administration remains one of the most sought after degrees in our program. TRIO SSS Business students are currently completing their degrees at a respectable 60% graduation rate. And when we review the percentage of our students who have earned their degrees over the last ten years, the success rates in other majors are also impressive, with the top five listed in the graph to the right.

MOVING FORWARD

As we move forward, TRIO SSS will continue to develop new strategies to help our students complete their degrees at a higher rate. With 84.7 % of our graduates currently completing their degrees in five years or less, TRIO SSS is well on its way to meeting or exceeding the targets set by the CSU San Marcos Graduation Initiative for 2025.

FALL 2016 CULTURAL EVENT

For this fall's cultural event the TRIO SSS students and staff visited the J. Paul Getty Villa in Malibu, Los Angeles. The Villa is a re-creation of an ancient Roman country house. The group enjoyed exploring the Villa grounds and seeing the artifacts and antiquities in the Villa Museum.

Fall 2016 FIRST YEAR BONDING EXPERIENCE

The students and staff visited Balboa Park specifically the Museum of Man exhibition, "Race: Are we really so different?" Later the group had great fun learning about the African culture through an African Drumming and Dancing Lesson at the World Beat Center.

WHERE ARE THEY NOW?

Yeltsin Gonzalez

Yeltsin Gonzalez graduated from California State University San Marcos (CSUSM) in May 2015 with a B.A. in Political Science with a minor in Business.

After graduation Yeltsin decided to pursue to Masters in Business Administration (MBA) which he is currently completing. Yeltsin said, "Since I graduated from CSUSM I have also started my own construction business, GCYG Home Remodeling. I apply what I learn from my MBA courses in my business regularly and it appears to be working. Upon graduating, with my MBA, I plan to help one of my Chinese friends open a private school in China and as a result I am regularly traveling to Asia to get the process started. I love business and constantly seek new opportunities that may arise. The most important thing I have learned has been making and maintaining relationships."
